

# STRATEGY TO WIN AT DEMOCRATIC MEET

## Delegate Figures Do Not Tell Who Will Be Candidate

### RELIGIOUS ISSUE LOOMS LARGE AS DEMOCRATS MEET

(SPECIAL TO THE GAZETTE)  
New York—With delegations from every section of the country arriving, the city began to take on a convention air today, though the entire number of delegates might be here and no one is able to locate them—lost in New York.

The hotels used as headquarters by the several candidates now are the only places where convention news is available.

What is of today is the fear of tomorrow. The religious issue looms

Al Smith, Governor of New York.

big. The fight against the Klan influence—and that influence is much more emphasized in the democratic convention than in the republican—has taken an acute place in platform making.

Underwood Hits Klan.  
From the south, Underwood has made that a paramount issue and has attacked the Klan in its stronghold. What the McAdoo forces will do is a question.

The bitterness of the fight between McAdoo and Smith makes it more and more apparent that neither can be nominated unless McAdoo has delegates enough to start with.

The Smith and McAdoo forces are chewing each other up.

The whole sum of the opposition

New York—The list of claims of the various candidates for the democratic nomination for the presidency. The nomination for the presidency. The nomination for the presidency. The nomination for the presidency.

The writer has obtained from one of the McAdoo managers a table which presents the maximum strength thus far of the various candidates for the presidency. Submitting this estimate to one of the most powerful leaders in the democratic party recently opposed to McAdoo, certain comments were made, having thus obtained the pro and the con from two opposite sources, the table is given not with the idea that it is given not with the idea that it

## Another Hot Wave on Way

(BY ASSOCIATED PRESS)  
Chicago—Another hot wave, a redevelopment of the one just ended, and which was followed by storms which, together, took toll of more than a score of lives, will sweep the middle states tomorrow, Henry J. Cox, district forecaster, announced today from the weather bureau. With the temperature steadily rising from 65 at 5 o'clock to 75 at 10 o'clock, a temperature of at least 90 degrees was probable for tomorrow, the weather man said. The heat should spread as far north as South Dakota and Minnesota. It was said. There may be some storms attendant on the heat and, although there has been relief in storms and showers generally, the southwest and south of the middle states will be affected by the redevelopment of the heat.

## MacDONALD IN PRIVATE TALK WITH HERRIOT

(BY ASSOCIATED PRESS)  
London—The conference between the French Premier, M. Herriot, and Premier MacDonald at the Court today will be private, it is announced, and nothing will be issued for publication. M. Herriot was due to arrive this afternoon. The diplomatic writers say no formal program of discussion has been arranged but that naturally the Dawes reparation report will occupy a large share of the time, while the inter-allied debt also are expected to be the subject of an exchange of views.

## HOWATT HEAD OF NATIONAL COMMITTEE

(BY ASSOCIATED PRESS)  
St. Paul—Alexander Howatt, Kansas, has been elected chairman of the national committee of the new farmer labor party. Aside from this fact, no announcement was made as to the details in the initial meeting of the body, held behind locked doors and from which all, even delegates to the convention, were excluded.

## JUDGE THINKS LOVE AND SPEED DON'T MIX

Madison—Love and speed are dangerous. Judge A. H. Reed, on the bench in superior court here Saturday when he fined Nick Kovacs \$50 and costs when Kovacs was brought into court by Sheriff Julius A. Krug on a charge of driving an automobile 20 miles an hour with one arm around a girl companion.

## BOYS' BAND WILL PLAY AT FAIRFIELD

Madison—Theodore Wonnish, Milwaukee, today was named president of the board of regents of the University of Wisconsin. Election of officers was the principal work scheduled to come before the board.

## Lofty Everest Still Is Unconquered; Two Killed

(BY ASSOCIATED PRESS)  
London—Mount Everest, the great irregular cone in the Himalayas, whose peak constitutes the outermost point on the earth's crust, is still unconquered.

The third expedition of intrepid climbers, like its predecessors, has failed, two of the explorers perishing in the final effort.

## THE LAST PARADE OF WISCONSIN G. A. R.

The last set parade of the Grand Army of the Republic, Wisconsin division, was given in Janesville, June 18. It was said by the Grand Army men to have been the finest parade in years. Views here show in upper left the passing of the small detachment of the Iron Brigade, Upper right, the reviewing stand with Commander Grand Army veterans went by on Milwaukee street ten thousand people saw the parade. In the lower right is the splendid drill team of the Auxiliary of the Sons of Veterans. In their striking uniforms the women of this organization as well as those in another drill team, the Daughters of Veterans, brought applause all along the line of march.

## Score Perish as Storm Sweeps on Toward Atlantic

(BY ASSOCIATED PRESS)  
Chicago—More than a score of deaths and property damage estimated at upwards of \$2,000,000 is the result in three states of the hot wave and the storm which yesterday swept through the Mississippi and Ohio valleys bringing lowered temperatures.

Five deaths from the storm in Illinois were added to the heat fatalities of several days. A seven-year-old girl was killed at Polo, Ill., when she stepped on a live wire blown down by the wind. Ernest Agoston, 23, and his two children, Gibson (12), were killed when a large tree fell on the automobile in which he was riding with them.

Joseph Maske, Stickney, Ill., was killed by a bolt of lightning.

Eight persons were reported prostrated by the heat in Chicago and 15 persons were said to have been bitten by heat-razed dogs. Although considerable damage was done by the storm throughout northern Illinois and southeastern Wisconsin, Chicago suffered little.

With 12 deaths reported due to heat in Ohio, relief was afforded by a violent wind storm which swept several sections.

The greatest damage of the storm occurred in Racine county, Wisconsin, where a half mile wide strip, 12 miles long was swept with estimated property loss of nearly two million dollars. Telephone lines were torn down and train service impaired.

## TWO DEAD IN DETROIT FROM HEAT AND STORM

(BY ASSOCIATED PRESS)  
Detroit—Two persons, both unidentified, met death here yesterday as a result of unusual weather conditions.

The first man was found dead on the street, overcome by the heat when the thermometer rose to 92.

The second, a woman, died last night during a thunder storm, when she fell or jumped from a street car which had been struck by lightning, fracturing her skull. The lightning blew all the fences and plumed the car in darkness. The conductor opened the door to pull the trolley as a precaution against damage by the lightning, and the woman fell to the pavement.

The thunderstorm, which was general over lower Michigan, brought relief from a two day period of excessive heat. No damage in the state had been reported early today except at Lansing where a hail storm caused losses estimated at several thousand dollars.

## PACIFIC COAST STRUCK BY HEAVY HEAT WAVE

San Francisco—A portion of the heat wave which caused a heavy death toll in the east apparently struck the Pacific coast.

Northern California experienced the warmest day thus far this year, with temperature of 100 degrees above zero in several cities.

Southern California teated in an unusual heat and warmer weather was promised for today.

## RUM RUNNER IS CAPTURED

(BY ASSOCIATED PRESS)  
Boston—The steamer Taboga, flying the Panamanian flag, sought for six months by the coast guard as the most elusive rum runner along the New England coast, was towed in here today by the coast guard cutter Albatross. She was captured off Block Island Thursday.

## STRANGE DELUSION LANDS WANDERER IN COUNTY ASYLUM

Elkhorn—Laboring under the delusion that recovery of \$31 from a "cat society" is necessary to a "big chance in the funeral business" by a collection of \$25, each on each, a man aged 40 years, who has been taken into custody at East Troy Friday. He is held for identification and it is likely he will be committed to an institution.

The man was tramping carrying a satchel and fainting a little while out the road. He was picked up by a farmer and taken to the county asylum, where he was held for identification.

He is a Swede, wears very plain clothes. He had no money or means of identification upon his person, and legged his foot.

## BIG COOPERATIVE MERGER PROPOSED

(BY ASSOCIATED PRESS)  
Chicago—A plan for grain farmers to own and control a huge system of elevators and grain facilities now controlled by five large boards, of trade firms which would be merged in a cooperative association, today was in the hands of a committee of the American Farm Bureau Federation and officers of the Wisconsin Division.

The plan was endorsed by George Meyer, president of the Armour grain company, who said he believed it would go through.

Although the firm of James A. Patton, known as the "wheat king" until the refusal to sell their properties at a good price, but nothing definite had been done toward their disposal. Mr. Patton said it plain that he himself had no connection with the plan.

## STATE AND AGENTS OF U. S. DISPUTE WOMAN'S CUSTODY

Chicago—A controversy between state and federal authorities has arisen over the custody of Louise Drafka, also known as Newton, in connection with the case against the 10 indicted on charges of robbing the Chicago, Milwaukee and St. Paul mail train of \$2,047,000 in September and October on September 12.

Superior Judge William Lindsay today ordered a thorough investigation of the custody of Miss Drafka, who is said to have appeared with \$30,000 in cash and jewelry taken from the train of Willis Newton, one of the prisoners. She was arrested immediately and the money taken possession of by the police.

Subterfuge Is Charged.  
When a writ of habeas corpus was sought in an attempt to liberate her, Judge Lindsay yesterday was informed she had been turned over to the federal authorities. This, he declared today, he had learned was subterfuge. The same statement was made to the court earlier in the week, when writs were sought for certain other prisoners, and the police informed the court the federal authorities had taken custody of the prisoners. At that time, however, post office inspectors said the prisoners still were in the custody of the police.

Besides promising a speedy trial for the men indicted yesterday, United States Commissioner Reiter today issued a subpoena duces tecum for \$60,000 in cash and jewelry taken from the train of Willis Newton, one of the prisoners. She was arrested immediately and the money taken possession of by the police.

## NAB MAN IN IOWA FOR ALLEGED THEFT

Emery Cramer, Clinton, alleged to have stolen a Ford touring car owned by Fred Wobke, also of Clinton, pleaded not guilty to the charge in municipal court Saturday morning.

The car, valued at \$150, is said to have been stolen by Cramer June 16. The preliminary hearing was set by the court for 10 a. m. June 24. Bail was fixed at \$100.

Cramer was brought back from Manchester, Ia., late Friday by Deputy Sheriff Charles Bartis.

## STAUDEMAYER WILL NOT RESIGN OFFICE

(BY ASSOCIATED PRESS)  
Madison—Senator George Staudemayer of Portage will not resign his resignation to Governor Blaine as a member of the highway commission at the present time, he announced today after an extended conference with the governor yesterday. Mr. Staudemayer was planning on offering his resignation, but said the governor did not approve such a plan.

## WATCH SENATOR GLASS

Another Theft in Beloit—Theft of a Chevrolet touring car in Beloit Friday night was reported to the local police Saturday.

## CASH TAKEN AT SAFADY STORE

Theft of money amounting to approximately \$25 from the Safady Bros. clothing store, 311 West Milwaukee street, was reported to the police Saturday. The store was entered through a back window leading into the basement early Saturday morning. Admission to the main floor was gained through a door, which the owners had left unlocked Friday. The thieves, according to the proprietors, did not take any merchandise from stock, satisfying their greed with the contents of the cash drawer.

## C.&N.W. MAKES TRAIN CHANGES

| Wisconsin            | 1      | 1     |
| Wyoming              | 1      | 1     |
| Totals               | 312    | 302   |

The second column contains many states who will have favorite sons but are expected to go to McAdoo on the third or fourth ballot, so adding 312 and 302 gives a maximum friendly strength of 614 for McAdoo. Out of the third column, the McAdoo managers figure they can get the 118 other votes needed to make the two-thirds necessary to nominate. They look for an additional 21 votes from New York if a break comes up, 10 from New Jersey, 6 from Rhode Island, 10 from Maryland, 8 from Virginia, 4 from Florida, 12 from Alabama, 4 from West Virginia, 4 from Ohio, 20 from Indiana, 10 from Illinois, 4 from Wisconsin, 4 from Washington, which totals 121 and, of course, the McAdoo people expect some of the 26 votes which come from Alaska, Porto Rico, the Philippines, Hawaii, Canal Zone, and the District of Columbia.

The foregoing, when checked over by a better foe of McAdoo, a man who controls many votes and who says he never will vote for McAdoo, brought out the following points of disagreement on the second and third columns:

States: Friendly Anti-McAdoo

|               |   |   |
|---------------|---|---|
| New Hampshire | 2 | 2 |
| Vermont       | 3 | 3 |
| Massachusetts | 3 | 3 |
| Connecticut   | 3 | 3 |
| Pennsylvania  | 1 | 1 |
| Nebraska      | 1 | 1 |
| Colorado      | 1 | 1 |
| Arizona       | 1 | 1 |
| Michigan      | 1 | 1 |
| Minnesota     | 1 | 1 |
| Missouri      | 1 | 1 |
| Louisiana     | 1 | 1 |
| Montana       | 1 | 1 |
| Wyoming       | 1 | 1 |
| Illinois      | 1 | 1 |

Subtracting these differences, the totals would appear to be 391 conceded to McAdoo as instructed or endorsed, and 295 friendly, or a maximum of 686 votes which leaves 536 anti-McAdoo outside of the territories. This same individual gives as his own prediction that McAdoo will have 467 votes in the first ballot and 392 on the second ballot and that he never will have enough to pass the majority mark, which is 518.

Butter on Figures  
The McAdoo managers, on the other hand, are confident that they will run up to 550 in a few ballots and then they will make a supreme effort to have the convention make a nomination, either by the majority vote or the appeal to enough delegations to break away to furnish the necessary two-thirds, but from both sides it can be written down even at this date, that neither McAdoo nor anyone else has a two-thirds vote assured and the McAdoo claim of a majority is disputed.

Don't forget to take your kodak with you tomorrow.

KENOSHA MAN SENDS  
FORTUNE IN PEONIES  
TO DISABLED YANKS

(BY ASSOCIATED PRESS)  
Kenosha.—Using his birthday as the day on which to send a remembrance to 15,412 wounded war veterans Henry S. Cooper, retired manufacturer of Kenosha, has mailed out a unique custom during the last week.

It took a fortune in flowers—more than 230,000 peony blossoms, picked from the Cooper Peony gardens at Dunnovin, the Cooper country home a mile west of Kenosha along the Geneva road. The flowers were valued at more than \$25,000 at the market price. It took also, hundreds of dollars in express bills and in labor needed to pick and crate the flowers to be shipped to government hospitals throughout the nation.

Mr. Cooper sent to every government hospital enough peonies so a bouquet of not less than 10 could be placed at the bedside of every disabled soldier there. This unique present was endorsed and praised by President Coolidge, who, at the request of Mr. Cooper, sent a list of the government hospitals to the Kenosha man.

"This is a splendid evidence of your interest in the disabled service men," wrote President Coolidge. Secretary of War Weeks, Secretary of the Navy Wilbur and General John J. Pershing also endorsed the plan and praised Mr. Cooper for his gift.

This is the third unusual birthday gift which Mr. Cooper has made to share product of his peony fields with others. First he gave peonies to the wounded soldiers of his city, then to those of the state and now to those of the nation.

SET JULY 1ST  
FOR POLITICAL  
RACE IN STATE

(BY ASSOCIATED PRESS)  
Madison, Wis., June 20.—July 1 will be the political campaign in Wisconsin take definite form, according to candidates here. Delay in opening the campaign of the gubernatorial candidates has been made because of the national conventions which are scheduled in the near future and the state campaign.

A. B. Hirst, former state highway engineer and a candidate for governor, declares he will not take the field until after July 1, declaring there is no need for it. He plans an extensive tour of the state on which he will outline in detail his stand on the various major issues outlined in his platform a few days ago.

Thine Wills

Governor Hirst also will wait to begin intensive work until it is determined what Senator La Follette's course will be in the gubernatorial campaign. It is said. The governor will seek the open support of Senator La Follette in his campaign. No indication of whether the Wisconsin senator will express his views on the gubernatorial candidates has been received here.

Contingents are continuing his speaking tour of the state and declares he expects to outline a definite speaking campaign within a short time.

Little interest is being shown about the capital in any other race than that for governor. Attorney General Egan has no opposition as yet. Neither has Henry A. J. Hirst, candidate for lieutenant governor or Solomon Levitan, state treasurer. Secretary of State Fred R. Zimmerman declares he will cover the state beginning shortly after July 1. He is opposed to William Dammann, Milwaukee.

Rack Co. Phone  
Case Is New One

(BY ASSOCIATED PRESS)  
Madison.—A new question regarding utility regulation has been presented to the state supreme court in the case of the Rock County Telephone company vs. the Wisconsin Telephone company. The question is whether a telephone company which central exchange is entitled to a portion of the toll income from the company owning the exchange with which the other cooperates, railroad commission officials say the case will be a test of the question.

The charm of lustre were is not to be resisted this time of the year, when the house clamors for color. One of the most brilliant ways of supplying it is with a lamp of lustre base. Deep blues, greens, yokes and black form a background or reflection for the high lights in the room. Subtle colors come and go, lights flicker and recede from the depths of its lustrous surface. Black satin finishes the base and fixture of these two-burner lamp bases recently received at Diehl's Drummond.

The soft glow of velvet sheer parchment shades in gold, brown and deep reds, blend exquisitely with the neutral blending of the bases. The velvet sheer shades have all of the color and mellow glow, when lighted, of the regular hand-painted parchments with the additional feature of being equally colorful, soft and velvety when not lighted. A hundred and one corners about the room, a home demand soft lighting to intensify their beauties. For these places, the single burner lustre and black satin bases in all shades are particularly ideal. Many have brass legs as an unusual standard. Small shades in unique shapes combine to make an artistic ensemble. For anything in the line of lustre shades, be sure you will find the best assortment at Diehl's Drummond.

Prints become the indelible mark of smartness.

For soft—the striped flannel jacket, a blize of mustard and geranium red, can be made the singularly conspicuous motif about which a daring costume for the links may be built.

Days grow warmer, footsteps lag and parched become dry and parched in the warm air. We shop a little, go to a show or even for a ride and we are craving refreshment. Thoughts naturally turn toward Razzook's for they can always be depended upon for something new and delicious in the way of a drink or fancy sundae. Now when so many fresh fruits are available, we may have fresh strawberry parfaits that are tantalizing wonders.

For these places, the single burner lustre and black satin bases in all shades are particularly ideal. Many have brass legs as an unusual standard. Small shades in unique shapes combine to make an artistic ensemble. For anything in the line of lustre shades, be sure you will find the best assortment at Diehl's Drummond.

"Oh, to be twenty-one, in love and honey-mooning," remarked George Elliot—but omitted the most important part. "In a Chevrolet." "Up!" For there is nothing in life quite like that care-free feeling that comes when one is off to the country in a jaunty little car that safely carries you with power, speed through the spicy air and bright sunlight. Just to stop at some lake for a dip or a tasty luncheon at some wayside tea room, regardless of time or distance, such is honeymooning in a "Chev." No difficulties arise to mar the pleasure of the trip of all trips. For there is no hitch in the mechanism to become out of "whack." It just purr-a on and on, responding instantly to the touch of the foot on the throttle and climbing hills with seemingly no effort at all. It's thrilling to say the least—just this wonderful and wonderful man and their Chevrolet—the one instance in which three does not make a crowd. It does not matter where you go on that homely old car. It does matter vitally whom you are with and what you go in. Don't forget that next to "how" you'll like your Chevrolet best.

That brings grow wider as the shadows lengthen. In the morning hats are as trim of outline and girl and wonderful man and their Chevrolet—the one instance in which three does not make a crowd. It does not matter where you go on that homely old car. It does matter vitally whom you are with and what you go in. Don't forget that next to "how" you'll like your Chevrolet best.

## When Milady Goes a-Shopping

Summer—time of the great vacation exodus—is just about with us. Let us give a moment's thought to what we will wear and where to go. It does not matter whether you are headed for trout stream or the most fashionable resort hotel you will enjoy yourself more if you are confident of your appearance. Summer nights are meant for dancing, and the girl who possesses one or more of these dainty dancing frocks is sure to find herself surrounded with many partners. Powder blue crepe, with tiny black dots, hung from a yoke to the hem, interrupted only by rows of cream lace at equal intervals. Another powder blue georgette with knee length tulle bands, a feather cascade of ostrich, the same shade as the dress, down one side and around the bottom of the tulle. Literally millions of tiny black dots, edged with black Valenciennes lace, form the skirt of a picturesque little dress of sea green chiffon. She who exhibits a remarkable flare for dressing well will be wearing one of these vaguely all frocks, in yellow or orchid with over jackets and corresponding scarf collars that throw around the neck. All of these and many more just as attractive you will see at the party—of course, you have already received your invitation to the birthday party at Brock's, at which there will be served a real, honest-to-goodness birthday cake to say nothing of the remarkable values in merchandise.

Charm does forever count—and for the woman who has a woman's abiding sense of personal interest, a jewel is as precious as a jewel.

These hot, sultry days would be unendurable, were it not for the ever faithful electric fan which sweeps its wings backwards and forwards, having a cooling breeze over my desk as I write this to you, readers. It suddenly occurred to me, what did we poor mortals do during the days of Westinghouse electric fans? To be sure, there were the good old palm fans, but the energy consumed in waving the same back and forth to keep our faces far exceeded the small benefit derived from it. Now most everyone sits in their offices or home, and enjoys this comfort at a very low expenditure.

There are the stationary and oscillating fans, the latter being far preferable because it keeps the air in circulation without making a stir. Many have electric fans, and many have a cooling breeze over my desk as I write this to you, readers. ## BULL DOG ROUTS STORE THIEVES

Lone Canine Stands Up Under Fire and Prevents Newark Robbery.

One good bull-dog, with a lot of canine determination, proved sufficient to rout several armed burglars who sought to loot the general store in Newark township, owned by Lawber and Lawber, late Friday night. The dog was left in the store and close to midnight, the thieves picked the front door lock and went into the store. There was a growl, a snarl and bark as the dog went into action. A. A. Lawber, one of the owners of the store, and his family, living next door, heard seven shots and the snarl of the enraged dog. As they looked out the window, they saw a powerful touring car slide out into the darkness.

All Shots Miss Him  
Going back to the store they found the bull-dog master of the situation. Not one of the revolver shots hit him. Apparently the dog met the erstwhile thieves right at the door, for only this part of the store showed signs of a struggle. Three of the bullets of the revolver shots were dug out of the wood-work and grocery supplies.

Warning to Small Towns  
Warning was sounded Saturday by Sheriff Fred Reley to owners of stores and banks in isolated districts and villages, of the increasing danger of robbery.

"It appears that the crooks and vegies in the large cities are coming out to the villages and townships to rob," declared the sheriff. "Precautions should be taken."

## TROLLEY COMPANY INSURES 18 MEN

Interurban Gives Policies of \$100 to \$1500 to 350 Employees, Free.

Eighteen employees of the Janesville Trolley company and about 350 on the lines of the Rockford & Interurban railway benefit by group insurance which has been put into effect, as of June 1. Announcement was made Saturday by Charles Murray, superintendent of the street car company, upon receipt of word from W. C. Sparks, general manager.

All employees in the service of the corporation one year or more will receive policies at no charge to themselves. These 1 service for one year and less than two received a \$500 policy. An additional \$100 is added for each year of service up to 31 years or over where the sum is \$1500.

Under the plan the wife, family or other dependents of the man, or his designated beneficiary, will receive the policy amount upon his death. The insurance plan carries a disability benefit payable to the man if totally or permanently disabled before the age of 60. The plan is retroactive credit being given for past years of service.

The insurance is given without the necessity of medical examination. In the event an employee leaves the company, the insurance will be discontinued, but the policy may be converted by the insured to an individual policy at standard premium rates without medical examination.

The company states that the insurance protection is in addition to any compensation which employees might be entitled under the state compensation act. The interurban adds that the plan is in recognition and appreciation of loyal cooperation rendered by employees in helping build the company.

The plan is instituted for the convenience of passengers in making train connections.

## MADE A BIG HIT

This is the drill team of the Auxiliary of the Sons of Veterans. They made a striking appearance and added much to the parade. During the afternoon of Wednesday this

team put on a special drill at the session of the Auxiliary in 1913 hall, and as guests there were members of the G. A. R. and visiting members of the Sons of Veterans.

Changes in the schedule so that one car is eliminated, and introduction of a plan to have several of the cars run to the railroad stations on South Academy street, are announced by the Rockford and Interurban company, as effective Sunday.

Cars leaving in Janesville at 6, 7:40, 8:40 and 11:10 a. m., 1:40, 2:50, 4:10, 5:10, 6:25, 8:10 and 9:40.

On the Sunday schedule the first leaving Janesville will be at 7:40 a. m.

The plan is instituted for the convenience of passengers in making train connections.

**The Boy Scouts in Janesville**  
What we have been building up here in a few  
months is an organization of boys with a definite  
objective in life and they have already demon-  
strated their value in civic matters. We know  
all they have done in the G. A. R. encampment.  
What we may not know is that they want to go  
to camp and those who are helping them want  
them to go. But it will cost a goodly sum of money  
and here is where the citizens can show how  
much they care for the organization as the Boy Scouts is  
appreciated, by aiding them. We have an asset  
for citizenship here second to none. Why not  
give it the support of all citizens?

Among the early dissenters was Satan who did  
not like the way the government of heaven was  
conducted. He had a platform of his own.

**The Farmer-Labor Counterfeit**  
Perhaps counterfeit is not a good word. Any-  
how the Farmer-Labor party organized at St. Paul  
claims to be something that it is not. And that  
makes a counterfeit.

We have had in this country for a long time a  
man named Foster—W. Z. Foster. He has been  
chased by police, followed by detectives, frequently  
arrested, tried for attempt to overthrow the  
government under the syndicalist law of Michigan,  
after having held a secret meeting near Benton  
Harbor and a discredited jury let him go. He has  
been on the witness stand and never has admitted  
his connection with the Third Internationale,  
nor has he been willing to say just what has been  
his aim or purpose. At first his work was among  
the labor unions with a "boring-in" policy hav-  
ing for its end the "One Big Union," and the de-  
struction of craft unionism. With that one union  
he would be ready to start his greater plan of  
establishing the dictatorship of the proletariat,  
which is the ultimate aim of Marxian socialism  
and the very basic principle of the Russian soviet  
as planned by Lenin.

But it has remained for the St. Paul convention  
of a putative but counterfeit Farmer-Labor party,  
to bring all these bugs heretofore in hiding under  
the rotten logs of secrecy, into the sunshine of  
publicity. Heretofore this organization has been  
the greatest asset and supporter of La Follette  
outside of Wisconsin. It has had several maga-  
zines and papers for reaching the public, has had  
close organization, underground to be sure, but  
nevertheless a volatile and easily mobilized crew  
—and up to a few days ago all this machinery  
was La Follette's to command. The Worker's  
Party movement was Allah and La Follette was  
its prophet.

There has been nominated by this man Foster's  
crew a national party ticket. That caused the  
real Farmer-Labor delegates to shudder. They  
suddenly discovered what has been patent to  
observers several years, that they have been in-  
viting support and assisting in the creation of an  
enemy organized for destruction of this govern-  
ment. They thought the Great Leader of Wis-  
consin was sincere in accepting their program  
when he denounced all and several in office; when  
he demanded government ownership; when he  
opposed the draft; when he assumed a position  
on most points in perfect harmony with Mr. Fos-  
ter and his kind. At St. Paul these farmers had  
to choose between Moscow and America. Some  
of them chose America. They were not ready  
for the class revolution and the establishment  
of a government of farmers and workers. Sudden-  
ly the farmers were made to understand that  
what they had been doing all this time was to  
aid in a movement to destroy America—the Amer-  
ica that belonged to them and their ancestors.  
They began to realize that every time they had  
cheered for Russia heretofore, they were building  
up this Foster instrument of destruction and rev-  
olution. They began to see that when they had  
applauded the speech of a Wisconsin congress-  
man in regard to his visit to Russia, they had been  
disintegrating the fabric of the United States.

There it was in reality—the old U. S. A. was  
to be put on the chopping block. W. J. Taylor, a  
Nebraska farmer, said it: "The farmer and la-  
borer believe our form of government is the best  
devised by man. They want to purge the temple.  
But they don't want to burn the temple down."

This revelation may do some good here in Wis-  
consin. Here the nursing of the Moscow wasps'  
nest has been going on for several years. The  
kind of "labor" meeting at St. Paul is not the  
kind of labor that produces something for a wage;  
it is the kind that wears out shoe leather on a  
soap box. The discontented farmer, played upon  
by promises, has accepted some of these things as  
being a part of the program to be put in force.  
He has been tricked. It is to be hoped that there  
will be an awakening from this St. Paul convention.  
The question will be asked many times in the  
next few weeks: "How far removed from Mos-  
cow is the movement, fathered by others be-  
side the Foster and Ruthenbergs?" "How sincere  
is this slobbering affection for the farmer, about  
election time?"

We ask the farmer to pause and give careful  
consideration to facts. There is a demand in a  
platform not adopted but presented at Cleveland  
for government ownership of railroads. What  
is its ultimate end? Ownership of all property  
now held by individuals. At St. Paul this clause  
was adopted in the platform:

"Land was created for all the people, and

## BATHING—PAST AND PRESENT

By FREDERICK J. HASKIN.

Washington.—The recent case of a Portsmouth  
woman who died from taking a cold bath, has  
called forth much serious discussion among med-  
ical authorities on the ancient but still baffling  
question of bathing.

Some assert a cold bath in the morning, is the  
best possible promoter of health, while others in-  
sist it is likely to be injurious to any but athletes.  
On the other hand, hot or warm baths are op-  
posed by some physicians on the ground that they  
take all the oil out of the skin, leaving it hard,  
dry and subject to severe irritation under quick  
changes of temperature.

There are those who declare a bath every day  
is necessary to good health, and those who main-  
tain that a daily bath tends to lower the vitality.  
There is here the drastic assertion of a well-  
known Pennsylvania doctor that all bathing is  
harmful.

All of these conflicting views may be supported  
by historical examples from one age or another.  
The Pennsylvania doctor who does not believe in  
bathing is no more eccentric than Michael An-  
gelo's father who, in a curious letter still extant,  
advised his son by all that is holy never to wash.  
"If you find it absolutely necessary," he said,  
"have yourself rubbed down dry, but do not let  
water touch your skin."

It seems likely that the sculptor-painter-archi-  
tect- poet followed his father's advice, for history  
records that while working on the ceiling of the  
Sistine Chapel he sometimes did not remove his  
boots for three months at a time. Nevertheless,  
he lived to be 90 years old and his gifts to the  
world were far superior to those of any other  
man of his era.

It should be borne in mind, moreover, that ab-  
stinence from bathing was not an uncommon fea-  
ture in Michael Angelo's time. Surrounded as  
they were with water, even the Venetians failed  
to use any for washing purposes, except to sponge  
their faces. Cosmetics were used in large quan-  
tities by men as well as women, and it is related  
that "they soaked their clothes in perfume that  
scented the air three miles off." Thus, the lack of  
water in the Venetian toilet was not noticed.

The early Egyptians, on the other hand, were  
especially invidious in the use of water both for ex-  
ternal and internal bath. The Greeks also bathed  
persistently, after which they anointed them-  
selves with oil.

With the Romans, the bath was a form of re-  
ligion. Later, in the days of Roman decadence,  
it became a form of debauch, which, together  
with other excesses, is supposed to have contrib-  
uted to the empire's ultimate downfall. Doubt-  
less it was the luxurious nature of the Roman  
bath which led the early Christians to regard it  
with marked disfavor, for in the succeeding Mil-  
lennium bathing was not popular.

With most Oriental peoples, the use of water has  
a religious significance.  
The same wide differences in bathing habits is  
noted among savage as well as civilized tribes.  
There is a tribe of Indians in central South Amer-  
ica, for instance, which is said to bathe ten or  
twelve times a day. This seems unduly exces-  
sive, but perhaps they look upon the rest of the  
world as unclean and deserving of contempt. Cer-  
tainly, it would be interesting to hear their views  
of Babylonians who have never even heard of using  
water for bathing purposes.

During the World War, American soldiers in  
Europe were sometimes compelled to go without  
baths for three months or more, and yet they re-  
mained in good health. One soldier, who declares  
that he was "wet and dirty and lousy most of the  
time, and took his baths six months apart," reach-  
ed the conclusion that bathing is a pleasure rather  
than a necessity.

"For I was never in better health," he says,  
"than during this bathing embargo." A private in the  
United States army, tells how when his division  
was shut up in winter quarters without indoor  
bathing facilities, he kept in good health by  
breaking the ice and bathing in a nearby stream.  
Here, too, he washed his single shift of underwear  
and uniform two or three times a week, rushing  
about naked in the cold air of the woods until his  
clothes were dried by a somewhat distant sun.  
And, according to his belief, this rigid adherence  
to cleanliness was the only thing that saved his  
life in the epidemic which carried off many of his  
comrades that winter.

The physiological necessity for bathing is too  
familiar to everybody to be given in detail here.  
We know that the human skin is constantly emit-  
ting a secretion through the pores which is not  
entirely carried away by evaporation. If the  
pores become blocked, one of the natural elimi-  
nators of the body is impaired, thereby throwing  
an extra burden upon the kidneys and intestines.  
As no organ of the body can take over the func-  
tion of another and perform it with the same de-  
gree of efficiency, the water of keeping the skin  
healthy and active is self-evident.

To insure cleanliness, a hot, soapy bath, at fre-  
quent intervals, is held by the majority of physi-  
cians to be absolutely essential. A good grade of  
sand-soap, liberally used, is most efficacious, while  
the addition of soda or borax to the water is  
sometimes desirable. Care should be taken, how-  
ever, not to remain in the hot bath too long, as the  
effect is debilitating. One objection to the hot  
bath which is frequently made is that it opens the  
pores and hence renders one susceptible to cold.  
It is possible that a cold might follow if the  
body were exposed to a chill immediately after  
taking a hot bath, but the danger is said to be  
but slight and may be avoided altogether by end-  
ing the bath with a spray of cold water.

The cold bath as a morning stimulant is recom-  
mended by a large number of modern physi-  
cians. As an invigorator there is no drug that can  
quite equal a cold plunge, but it must be  
taken judiciously—like all stimulants—if the  
effect is to be beneficial. The old and the feeble  
and those in delicate health should leave it se-  
verely alone.

The cold plunge or shower should be brief, as it  
has a dynamic effect upon the circulation. By  
driving the blood swiftly to the internal organs,  
it either stimulates them or overwhelms them.  
This is followed by a rebound of the blood—usu-  
ally called reaction—which produces an agreeable,  
tingling sensation. Unless this reaction occurs,  
the bath has been a failure, and a chill likely to  
result. Hence, it is always possible to tell by this  
test whether cold baths are suitable for a person  
or whether, as in the Portsmouth case, they are  
highly dangerous.

We demand a system of land tenure which  
will eliminate landlordism and tenantry and  
will secure the land to the users thereof.

In Russia there is no individual right in prop-  
erty. It is owned in common. No title exists for  
metes and bounds of a place man may call his  
own. That is what the St. Paul plank means.  
First the railroads, then the industries, then the  
lands in Russia were taken in common. They were  
held by the 450,000 communist officials for the  
150 millions of people. Enter the wedge of own-  
ership of railroads in the United States and the  
next demand will be for something else—farms,  
homes, all private property.

There were a few thinking farmers at St. Paul.  
They read this plank in the platform and walked  
out of the convention. "They were not ready for  
the week of everything American on a platform  
dictated from Moscow."

The hour for demagoguery has faded into an  
hour for thought and question as to sincerity in  
leadership of men fathering such un-American  
proposals.

## JUST FOLKS

By EDGAR A. GUEST.

THE LAST TO LEAVE

The way of women, I profess,  
Are far beyond the mind of man;  
Too deep are they for us to guess,  
And have been so since life began.  
But this I've learned beyond a doubt,  
A truth which I have come to know:  
For her I have to stand and bow,  
Long after it is time to go.

When with a company of friends  
A pleasant evening we have spent,  
And finally the laughter ends,  
And the high tide of merriment went,  
I get my coat and rubbers on,  
And watch the other guests depart—  
Down stairs she'll be the final one,  
We always are the last to start.

Now other men have wives who can  
Pick out their bonnets and their shawls,  
And hurry down to join the man  
Who waits below and loudly calls.  
But I must stand around and wait,  
Till every guest has taken flight;  
We wait, the weary he and I,  
For wife to come and say good night.

I've helped him huddle chairs about  
And stacked up tables by the wall,  
I've seen the last bright light put out  
Except the beacon in the hall:  
Though others seem to look away  
This is an art she can't achieve,  
"Goodnight," she knows not how to say,  
We always are the last to leave.

## HOROSCOPE

MONDAY, JUNE 23, 1924.

Astrologers read this as a doubtful day, for  
while the sun is in the sign of Gemini, the  
afternoon, Uranus, the Sun and Venus are all in  
evil place.

This should be a fairly good planetary rule  
for business, but all financial affairs should be  
curbed on the most conservative manner.

Thrift should be preached and practiced by  
persons in every walk of life in the United  
States.

Occultists stress the fact that America in-  
evitably must pursue conditions more  
and more. For this reason all forms of waste  
is particularly sinful at this period.

Honor and popularity is indicated for the  
president of the United States.

Delicate issues of the country and for-  
eign nations are concerned appear to be follow-  
ing one upon another in the coming weeks.

Epidemics of various sorts may be expected  
during the summer when much care should be  
exercised to avoid all forms of poison or in-  
fection.

This is read as an unusually unlucky day for  
lovers, who may try to deceive one another.  
Much woeing that is a mere pastime is fore-  
cast for the summer and many marriages may  
be looked for by young and old alike.

There is a sign supposed to encourage vanity  
and attention to the physical well-being. Beauty  
specialists will prosper as never before.

A violent storm on the coast of Oceania is fore-  
shadowed and it may cause serious wrecks.  
This is not an auspicious rule under which to  
seek any sort of employment. Those who de-  
clare positions should await a more favorable  
configuration.

Persons whose birthdate it is should not travel  
or make changes in the coming year which  
will bring rewards for past work.

Children born on this day probably will be  
great travelers. These subjects of Caesar are  
generally most fortunate in their undertakings.

True first aid work is not in the proper ap-  
plication of a bandage, but in the prevention  
of the accident.

Better to tee up for a round of golf than to  
dig up for a round of medicine.

The board of health has a large collection of  
stones, thrown by people who live in glass  
houses.

He who toils with pen or engine,  
Selling goods or the other kind,  
Most indulge in recreation  
If he'd stay old Nature's hand.

Just as a general proposition, the direct ap-  
plication of strong remedies to delicate tissues,  
kills the tissues but not the germ.

## HISTORY OF TODAY

TODAY'S EVENTS.

This is the first day of summer.  
One hundred and fifty anniversary of the  
birth of Daniel D. Tompkins, sixth vice-president  
of the United States.

Mexico is celebrating today in celebra-  
tion of the anniversary of the final overthrow  
of the Maximilian empire.

Today will serve the third completion of all ar-  
rangements for the democratic national conven-  
tion.

TODAY'S ANNIVERSARIES.

1611—Henry Hudson, his sons, and five others  
were set adrift by his mutinous crew, and  
perished in Hudson's Bay.

1749—Balthus, N. S., was founded by Cornwallis  
and his company.

1858—The cable laying an Atlantic cable  
failed through a violent storm.

1857—The republic was re-established in Mexico.  
The United States sent a fleet to Mexico to  
practise the principle of brotherly love  
in his business, has been given this  
name. He recently distributed among  
his 4,000 employees a \$500,000 dividend  
and stated which ultimately will give  
them control of the enterprise.

## Personal Health Service

By WILLIAM BRADY, M. D.

Noted Physician and Author.

A BIG BARK

"The most terrible" cough usually  
comes from the most serious condi-  
tion. I'll never forget the cough  
which Billy had. Billy was about  
the busiest young man in the most  
unburied town in the state, a youth  
of just the right age, temperament  
and complexion to make a fine sub-  
ject of tuberculosis. He called his  
cough an "elephant cough," and it  
sounded that way. "Fighting" every-  
body declared, and he ought to do  
something about it. It got on his  
nerves, especially the women folk  
who kept constantly warning him  
about his terrible cough. So he tried  
a few bottles of the cough medicine  
which happened to be featured by the  
neighborhood druggist at the time,  
and finally visited the doctor in a  
great hurry and couldn't take time to  
undergo an examination. So the doc-  
tor tried on Billy some of the cough  
medicine which happened to be fea-  
tured by the physician's supply house  
at the time, and Billy kept right on  
coughing terribly and frightening  
everybody, even the doctor, a little.  
One day, finally, one day the doctor  
caught him in a bit of business and  
made his peep his shirt, and went  
over his lungs with great care and  
pains and found not a bit of trouble  
of any kind. Great mystery, that  
cough. Well, presently the spring  
medicated somewhat and there came  
a Saturday night when Billy took a  
bath in the hot tub. Even good  
drugs don't cure a cough, and Billy  
couldn't hear clearly and visited  
the doctor again. There's a little  
more to tell, as they say in novels.  
The doctor, who was a large, hard-  
faced man of wax in the ears, and  
discovered the source of the elephant  
cough, for the slightest touch of the  
tip of the ear canal with a specu-  
lum of the great pneumonic nerve  
is distributed brought on a  
sudden coughing spell every time.  
When the plugs of cerumen were re-  
moved, the coughing ceased, and to  
the disappointment of all his good  
women customers who were working  
up sure cures for him.

That would be called "reflex cough."  
That is really part of the re-  
spiratory tract, that it is not very  
remarkable that irritation even in the  
outer ear canal should induce a  
cough. Cough is sometimes a mis-  
leading symptom in acute pneu-  
monia, a slow, hacking, annoyingly  
persistent cough, which might readily  
draw suspicion on the innocent  
trachea or lungs.  
Children who begin to bark and  
cough after they have gone to bed  
at night are commonly uttering a de-

mand for the removal of adenoids.  
And a great many cases of alleged  
acute bronchitis in children are in  
reality merely acute inflammation of  
the lymphoid tissue in the roof of  
the pharynx—adenoiditis. An infant  
or child is likely to cough consid-  
erably when lying down, particularly  
lying on the back, in simple coryza  
—acute inflammation of the lining of  
the nose—from secretions dripping  
down into the throat. To ply a child  
with any alleged "cough cure" in  
such circumstances is a perilous  
but still a popular practice in some  
households.

QUESTIONS AND ANSWERS.  
Nursing Mothers' Diet.  
(1) What raw and cooked fruits can  
be eaten by nursing mothers? (2)  
What raw and cooked vegetables? (3)  
What foods and drinks supply the  
most milk? (4) Is it advisable to give  
a nursing baby much water, and how  
much in 24 hours? (Mrs. G. L. S.)  
Answer.—All raw and cooked fruits  
except elephant tushes and cala-  
marozuma. The fresh green vegetable  
and greens perhaps supply the most  
and best milk. A great danger of a  
baby getting too much water, espe-  
cially in warm weather. Should he  
reject the excess without any  
great fuss. The nursing mother  
should omit fruit her diet and have a  
food of drink that is ordinarily de-  
manded.

Is it wise for a man with positive  
T.B. to be in an office where he comes  
by close contact with other clerks?  
Would chewing tobacco in any way  
lessen the chance of getting it? This  
man chews tobacco and spits any  
place where he happens to be. Why  
do the health authorities quarantine  
measles and let tuberculosis go un-  
controlled? (H. S.)

Answer.—Perhaps the health au-  
thorities are unaware of the danger. You  
should, in your own interest, report  
the case to the health officer. If the  
man chews tobacco and spits in any  
place as you say, he is a menace to every-  
body who has to enter the office and  
he should be suppressed as a public  
nuisance. There is no danger of a  
more certain way of contracting tu-  
berculosis than that tobacco chew-  
ing does not do.

Take It Hot or Cold.  
Might taking shower baths, if conducted  
daily in summer, very fond of it.  
Any harm to system (W. P.)  
Answer.—No. It is wholesome hot  
or cold.

Q. Is Glacier park in the United  
States or in Canada? M. L. S.  
A. Each country has a "Glacier  
park." The one in the United States  
is in northwestern Montana, while the  
one in Canada is in British Columbia,  
in the Selkirk.

Q. What gave Cape Cod its name?  
P. T.  
A. Cape Cod was so named by  
Bartholomew Gosnell, because he  
caught many codfish there.

Q. Does America produce as much  
corn as it uses? A. P. S.  
A. America produces 43 per cent

PARIS' JAZZ QUEEN, CALLED PRETTIEST  
BLONDE IN FRANCE. BOUND FOR U. S.

Mlle. Lilliano Dorsay, one of France's most famous women, will be an American visitor shortly. The pretty mademoiselle is not a scientist, nor has she painted a picture or written a book; she is famous because she introduced the "shimmy" in Paris and because of her two titles, "Parisian jazz queen" and "most beautiful blonde in France." Mlle. Dorsay sings songs of her own composition in her act.

**THE CALLED PRETTIEST  
NCE, BOUND FOR U. S.**

A black and white portrait of a woman, likely a French actress, with blonde hair and a pearl necklace. The image is a close-up, showing her face and upper torso. She is wearing a dark, possibly velvet, garment with a high collar and a long pearl necklace. Her hair is styled in a voluminous, wavy manner, typical of early 20th-century fashion. The lighting is dramatic, highlighting her features. The image is framed by a decorative border.

## Busy Man's Sport Page

By FRANK SINCLAIR

THE LIST of leader-batters this week has the sound of a minstrel gathering. One Maurice Archdeacon, outfielder for the Chicago Americans, has come out of seclusion and has displaced Harry Heilmann as the leader of the league circuit. And, get this! Mr. Archdeacon is leading by a mark that is below the 400 count. Heilmann of the Detroit Tigers was out of the game for several days because of an operation for sinus trouble. That was most number 1 for the St. Louis Cardinals. Then when Harry Heilmann returned to the game, he did so, quite a bit of his efforts were confined to the winking of sneering lips. Therefore, the position of Mr. Archdeacon with a batting average of .375 for 41 games during which, says the Associated Press, he has been at bat 104 times and has made 21 hits for 44 total bases. Heilmann, who has an average of .364 for 57 games, Jameson is right behind with 303 and Ruth is next with 301. Then comes Heilmann with 299.

THERE is nothing to the National league report this week but to repeat the names that were mentioned last week. Heilmann of St. Louis is still first with .374 for 52 games. He is followed by Wheat of Brooklyn with a tie, with Snyder, New York, at .352. In team batting, Washington is the best club of the Americans with .301 in 53 games. Cleveland having the same percentage, but for 51 games. In the Nationals, the 1925 team are on top with .288, trailed by the Dodgers with .285. Though Neun of St. Paul dropped 16 points during the week, he is heading the American association with .416.

THE HOME run race continues to be merry. Babe Ruth now has 16 circuit drives, leading both leagues, and four behind in the National. The base stealing honors in the American league are shared by Collins, Chicago, and Williams, St. Louis—10 each. Fowler has 13 home runs in the Nationals. Grigby of Chicago has swept the theft honors with 13. In sacrifices, Heilmann of Detroit has 14 to his credit. Turning to the American association, Neun was so busy worrying over his slump in hitting that he did not increase his base stealing mark of 26. Russell, of Columbus, and Smith, of Louisville, are in front with eight homers.

## Boosters Expect Win on Sunday; Two Big Battles

If all the dope in the bucket is mixed right, Jameson will continue to be on top of the heap in the Southern Wisconsin league after Sunday. The Boosters take a joint vote to Cambridge there to meet Wallace's cellar champion.

It will be the first meeting of the season between these clubs. Cambridge has been having an unfortunate break in the luck, losing not only games but players. The Dane county team has now had the misfortune to see its pitcher, Henrich, quit and run over to Lake Mills.

**Big Game at Bluff.**  
"Peds" Lauphere will again be on the mound for Janesville. It is expected that Fred Cawthorpe will be in condition to take first, his injured foot having improved.

While this will be the most interesting game of the circuit this week, there are two others that mean much to the several teams.

Much importance is being attached to the contest at Charley Bluff at Lake Koshong where the Port Atkinson club meets Milton once again.

The Miltoners of the Port are going to have all their guns ready and their shock troops lined up to take the hide off Cambridge's Legionnaires.

It was Milton who knocked the breath out of Port in the first game of the season and won, 1 to 0, starting the Port on their first slump in two years.

A win for Port will put the club in a strategic position to advance out of third, perhaps into second, and on toward first.

**A Real Battle.**  
In the other but home—Edgerton at Broadhead—the Broadhead boys have the vision of yet taking first place by winning and the possibility of Janesville losing, in which event the American association, Neun.

On the other hand, Edgerton will have the opportunity of holding fourth by a win.

The Janesville boys will leave here at about 12:15 for their trip.

## Welsh, Brodhead, Leads in Batting

Making four hits in four times at bat last Sunday, Welsh, shortstop for the Broadhead club, has shot into first place in the batting averages of the southern Wisconsin league. Official averages were given out on Friday by P. M. Hallett, Janesville, secretary. Welsh now has an average of .612 as against .222 a week ago. That 1000 percent was surely some bond.

Kramer of the Port, first last week with .567 for one game, now is second with .500 for two.

**Port Still Third.**  
Les Pilsch of the Port, who has held his position of third, has boosted his percentage in .581 from 538 last week, due to three hits in four trips to the plate against Milton. Next in line comes Kalkuske, center-field for Milton and a Janesville boy, who has .553. He had .454 and was in second last week. O. Anderson of Broadhead, with .521, remains in fifth. Lauphere of Cambridge, who was virtually first a week ago, having .460 for three games, now is in ninth with .451.

It is a merry race. There are two men with better than .500; four with more than .400; and four over .300. The Janesville Boosters, with their 12 hits against Milton, have increased their average in team batting to .347 from .295 and are away out in front. Port Atkinson, second last week with .581, retains that position, with an increase to .518. Brodhead has come up from fifth to third and has .272. Edgerton dropped from third to fourth, now having .254. The Milton club dropped one place, going into fifth with .211, just two points back of their previous figures. Cambridge, slumped, getting but six hits off O'Connell and still in the cellar, have dropped to .175.

**Milton Is First.**  
The Milton team was the only team to have a perfect day in the field last week and as a result is now leading the circuit with a fielding average of .950, as against .901 on the last report, when they were in fifth. Brodhead ranks second in this department with .925, a place higher than they held last week. Janesville is now in third place, now having .917, as compared with .895 last week. There is a big race on between Cambridge and the Port. Cambridge has displayed better work and is now in fourth, with .885, a point to the rear comes Port Atkinson for fifth place, with .888. Seven errors made against Edgerton last Sunday sent the Miltoners tumbling from second place, which they had held with .925. Edgerton was guilty of 10 base last Sunday and that put them down in the cellar with .871. The Toledo City club had been first with .931.

## Yale Crews Win All Three Races from Old Harvard

(By Associated Press)

New London, Conn.—On eve of departure for France and the Olympic struggle on the Seine for the world's rowing championship, Yale was able to make doubly certain her right to represent America abroad, has imposed a three fold defeat on her ancient rival, Harvard.

On the heels of decisive victories over Harvard's freshmen and junior crews, Yale crews, Friday on the Thames course, the Yale varsity, eight by four lengths, led home the Crimson crew.

The race over the 4-mile course at the end of a perfect day for Yale, marked the close of two years of uninterrupted victories for Yale and closed the second college season under the tutelage of Ed Leander, former coach of the University of Washington crew. The contest, which again demonstrated Yale's right to row in the Olympic championships, an honor won but a week ago, was a grueling one, marked by spirits, but noted for its steadiness, in which Yale gained an early lead and increased it at an average of a length each mile. The blue crew finished strong at a stroke of 37.

PRESENT FARM PLANK**

### AT DEM. CONVENTION

Chicago—At the democratic national convention next week, O. E. Bradford, president of the American Farm Bureau federation, and Gray Silver, Washington, representative of the A. F. B. I., will present to the democrats the same agricultural plank for their party platform which was submitted to the republicans last week by Sam H. Thompson, president of the Illinois Agricultural associa-

The agricultural plank submitted by the American Farm Bureau federation touches specifically on encouraging development of former co-operative marketing organizations; continuance of production of marketing studies; improvement of farm-to-market trade relations; maintenance of low interest rates through the federal farm loan system; comprehensive plan for

water power development; opposition to a sales tax; favoring the building of public roads and highways and improvement in transportation systems; and the American National Marine, asking agricultural improvement of public boards; improvement in postal service; and restriction of reclamation projects.

Many of the planks and splinters submitted to republicans were assimilated into their platform spirit, if not in exact wording. The district plank submitted to the republicans by the American Farm Bureau federation requested it to "take what steps

## WHAT WOULD YOU SAY?

## "HUNTING SNIPE"

"The Times—New York. Your desk, dining room table, library table, arm of a chair, front porch rail, silver seat—anywhere. The Postal card, pencil or pen, ordinary brain, not more than a dozen words of English as she is spoke. Thursday noon is the deadline for your postal to land on this title ed's desk, remember. "Hunting Snipe," takes the blue ribbon and the \$2.50 this time and the author is R. L. McCoy, Evansville. Other good ones were numerous, but it's too hot to write many of them. "Treasures of Conquest," is the best on the card, from Leroy M. Lewis, Evansville. Good one, isn't? He also suggests "A Bum Cleanup."

## MILTON

Milton—Mrs. W. F. Livingston and son, Ivan, returned to their home in Milwaukee Wednesday after visiting her mother, Mrs. Ida Wells. Mrs. Wells accompanied them home and will remain for a short visit.

Miss Myrtle Jones is working for the Parker Pen company in Janesville.

Raymond East, a student at Milton college, returned to his home in Holland, N. Y., Monday.

Dr. W. D. Chesney, who has been very ill in the American hospital at Chicago, is gaining in health and expects to return to his work in Milton in a short time.

George J. Adams of Providence, Rhode Island, has been the guest of the Janesville cabinet company for several days.

Mrs. Richard E. Hull, who has been very ill for two weeks, is a little better. Mr. Hull is now resting more comfortably.

Mrs. Carrie E. Davis is visiting at her home in Siltsh, New Jersey.

Prof. J. Gray Hall of Milton college, left Thursday for Woods Hole, Mass., where he will take up research work on the respiration of fishes at the Marine Biological station.

This is a continuation of the work Prof. Hall took two years ago at the same place. More research work is done at the Marine Biological station than at any other place in the United States, as there is more sea animal life there to work with. Prof. Hall will be gone about eight weeks.

The Women's Village Improvement club will hold their annual picnic Thursday afternoon, June 26, on the college campus near gymnasium. A business meeting will be held at 2 o'clock after which Mrs. Della Prehm will talk on the "Fox Industry."

Club members and their families are invited. Supper will be served at 6 o'clock. Each member is requested to bring sandwiches, a dish to pass and their own eating utensils.

**AT THE BEVERLY.**  
In "Don't Marry for Money" Ruben De Roemer plays the part of a small-time gambler who, having been raised in a poor home, has come to wealth and is now a millionaire. The picture is a masterpiece of action and suspense, and is a must-see for all who love the screen.

**AT THE APOLLO.**  
The greatest picture ever filmed—no less than "Unseeing Eyes" has been dubbed. In a terrific blizzard, Miriam, a society beauty of Quebec, is lost in a snow storm and her husband, Conrad, set off in search of her. Conrad, a man of action, is aided by a woman, a girl named Dick, and a man named Dick. The picture is a masterpiece of action and suspense, and is a must-see for all who love the screen.

## Miss Yerxa Named

Juvenile Director

Madison—Appointment of Miss Elizabeth Yerxa, supervisor of the children's bureau of the Minnesota state board of control, St. Paul, as juvenile director of Wisconsin, was announced today by the state board of control.

Miss Yerxa has accepted the position, it was stated, and will take up her work on July 16.

The position of juvenile director was created by the board of control for supervision of all juvenile work instead of selecting four district supervisors as contemplated some time ago.

Miss Yerxa is a native of Fargo, N. D., and a graduate of the University of Minnesota. She has been engaged in social welfare work since 1915, as assistant and district superintendent of the Associated Charities of Minneapolis, probation officer of the juvenile court, Minneapolis, and director of the social service department of the Minneapolis City hospitals before entering state service.

During the war, Miss Yerxa was special representative of the American Red Cross at Rockford, Ill., and did social work at Camp Grant. She was director of social welfare at Rockford during 1919 and 1920 when she returned to St. Paul as supervisor of the state children's bureau.

Organization of the juvenile department of the state board of control will be undertaken by Miss Yerxa immediately upon assuming her duties here. A complete revision of juvenile activities of the state is contemplated. The appointment was made after competitive examination by the state civil service commission including candidates from throughout the nation.

**FIVE BAND CLASSES TO MEET WEEKLY DURING SUMMER**  
Five band classes a week have been arranged by Director H. C. Jack, for the summer vacation period. The meetings of organizations will be as follows: Girls' band, Tuesday, 2 p. m.; boys' uniformed band, Tuesday, 2 p. m.; assembly of all bands, open to any students who wish to practice, Wednesday, 7 p. m.; band of boys of high school age not in uniformed organizations, Thursday, 10 a. m.; all grade school bands and 7-3 students, Thursday, 2 p. m.

Approximately a dozen places in the boys' uniformed band will be open to all students. Director H. C. Jack and the vacancies will be filled from picked members of the present high school boys' class, which meets on Thursday mornings.

Playground concerts are being planned again this summer. They will probably be held on Wednesday afternoon. A rehearsal of a special group has been called for Monday night.

## The Secret of An Easy Riding Car

The automobile of today is a different machine to that of five or six years ago. Motors are more reliable, tires give two or three times more mileage, bodies are greatly improved in appearance and comfort, and they ride better if you know how to look after the springs.

I can imagine the average motorist saying that there is not much to look after in the springs, all you have to do is to splash a little oil over them now and again.

Now it may surprise you to know that it is just as easy to OVER LUBRICATE the springs as it is to not give them sufficient oil. The idea of the springs is to absorb the shocks when driving over rough or uneven roads. When your wheels pass over a bump, the leaves of the spring first take the shock, then absorb the rebound.

Now here is the point you want to learn about springs. When the car passes over a bump, the shock depresses the spring and as it comes up on the rebound, THE FRICTION BETWEEN THE LEAVES DAMPEN OR ABSORB IT. If the leaves of the springs are lubricated too often it makes them so smooth that there is practically NO friction between them, then you have a car that shoots you up in the air every time you pass over a bump. When the springs are TOO LIVELY, it makes riding uncomfortable and is liable to do the excessive bouncing, flattens the springs and allows the frame to bump the axle. You would not think of taking a heavy sledge hammer and giving the axle a few dozen heavy blows, yet the effect is just the same if your springs are so lively that they hit the axles every time you go over a big bump. In addition to this you will have large bills for broken spring leaves.

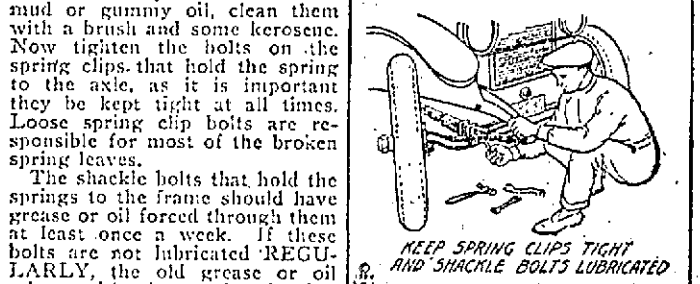

If, however, you DO NOT LUBRICATE the springs sufficiently, grit and water work in between the leaves and rust them up. You will then have TOO MUCH FRICTION between the leaves and they will have so little movement that they hardly act as springs at all, and every time you go over a bump, the shock nearly shakes your teeth down your throat, and your car soon starts to rattle and 'bolt' and nuts become loose in every part.

The spring's leaves should receive attention about once a month. If they are covered with mud or gummy oil, clean them with a brush and some kerosene. Now tighten the bolts on the spring clips that hold the spring to the axle, as it is important they be kept tight at all times. Loose spring clip bolts are responsible for most of the broken spring leaves.

The shackles that hold the springs to the frame should have grease or oil forced through them at least once a week. If these bolts are not lubricated REGULARLY, the old grease or oil mixes with the road grit that works in and very soon the hole through the bolt is blocked up and the shackles squeak and rattle. If you find you cannot force the grease through so that it oozes out at BOTH ends of the spring bushing, the best thing to do is to jack up the frame to take the weight off the springs then remove the bolts and clean out the holes. If there is very much play in the shackle bolt bushings, or if the bolts are worn badly, they should be replaced or they will make the car very noisy on the road. Examine each spring carefully to see that no leaves are broken. If any are, replace at once or the other leaves will break very quickly.

When you have attended to the spring clip bolts and the shackle bolts, paint the spring leaves with one of the special spring oils or ordinary lubricating oil. Do this about once a month. If you find that the springs are too lively, fit a pair of good shock absorbers and they will improve the riding qualities of any car and prevent spring breakage.

# Nothing Counts Except Results and You'll Get Them From These Little Ads

## Classified Advertising

All ads are restricted to their proper classification and to the regular Janesville Gazette style of type. Errors in advertisements should be reported immediately. The Gazette will not be responsible for more than one insertion in any one advertisement. Daily rate per line for consecutive insertions:

|            |             |
|------------|-------------|
| One day    | Charge Cash |
| Three days | 15          |
| One week   | 30          |

Advertising ordered for irregular insertions takes the one time insertion rate, not less than five lines at fifty cents. Charged ads will be received by telephone and if not at office within six days from the first day of insertion, cash rate will be allowed. Ads ordered for three days or six days and stopped before expiration, will only be charged for the number of times the ad appeared, and adjustment made at the rate earned. Special rate for yearly advertising upon request.

Publishers reserve the right to edit or reject any classified advertising copy. Telephone 2500, or ask for an Ad Taker.

**Absorbing the Shocks of Spending**

They're talking a great deal these days about balloon tires and the comforts they add to motoring.

Lots of people will be glad to know that similar shocks-absorbing equipment has been devised for pocketbooks.

Spending isn't a painful process full of hard knocks, if you allow the A-B-C Classified Ads of the Gazette to absorb its shocks.

You won't have to delve into the classified section very long before you realize why this is so. You will uncover all sorts of opportunities to buy necessities and luxuries at prices less than you expect to pay.

That's the whole story in a nutshell.

In the classified columns the only "hard knocks" are those with which Opportunity seeks to attract your attention.

**25 Minutes gas for a full meal!**

## then COOK with the Gas Turned Off

With the gas on but 25 minutes, can you go away for the afternoon and return to find a perfectly cooked meal?

You could if you cooked as some women in this city do—on the Chambers Fireless Gas Range. You would not only free your hours for many things you have in mind, but would cut your gas bills in half and make food more delicious by keeping the rich juices in.

For the dishes you roasted or baked in the

specially insulated Chambers Oven and those you boiled or stewed under the Thermomane, you would burn gas only a few minutes, then turn it off. Retained heat would finish the cooking and on returning you could count your gains in economy of gas, time, effort, food and flavor.

No, of course we wouldn't let Bessy into Mrs. Bride's immaculate kitchen—but her rich creamy milk is very essential in the preparation of the delectable dishes with which Mrs. Bride will tempt Hubby's appetite.

Merrick's Milk and Cream is noted for its richness and purity. There's a Merrick wagon that makes daily trips past your door. Phone us and we'll tell the driver to make regular deliveries.
